1. Develop an automated searching program using JavaScript to search text containing the word "red" and the phrase "pick-up truck" close to each other, followed by a "price". Specifically, you should match the words "red" and the phrase "(pickup/pick-up/pick up) truck" separated by at most two other words in between. The pick-up truck phrase could appear before or after the word red. After the words red and the phrase pick-up truck, the text should also contain a price as dollar, for example, \$3.56 and \$1,000,000 are valid amounts, whereas \$5.321 and \$-5, 29, 40 are not.

Html:
<!DOCTYPE html>
<html>
     <head>
          <title>Pickup Truck</title>
     </head>
     <body>
          <form><input type="text" name="fname" value="Red pickup truck" /></form>
           Click the button to validate the string
          <button onclick="validateForm()">Try it</button>
          <script>
